

ARENAGUARDTM

ARENA DUST CONTROL

**Safe Non-Toxic Formula (Polyacrylamide with Gypsum)
Veterinarian & Trainer Recommended.**

Instructions for Use:

- 1) Work arena footing smooth (and as level as possible) when dry.
- 2) Using a broadcast spreader (Initial Application):
Apply Arena Guard at a rate of (2 lbs) per 1,000 square feet.
- 3) Incorporate Arena Guard with harrow or drag.
- 4) Water arena footing as normal
(less water will be required on a daily basis due to the activation of product.
- 5) Groom footing smooth.
- 6) Maintenance doses are recommended of (1 lb) per 1,000 square feet or (1.5 lbs) for older or thicker footing.

Arena Guard will stay active for approximately 45-90 days, depending on footing type, use and watering schedule.

Contact a CalPam technical sales representative for more information and specific questions.

**For Indoor & Outdoor Use.
Not for human or animal consumption.**
